\* Indicates additional feature on the Skyline AE

### Superior Needle Threader V2

It's a one finger operation, directly push down the needle threader knob until it stops, then slowly raise the threader knob; the thread is pulled through the eye of the needle.

### AcuFeed Flex

Janome's AcuFeed Flex system is an advanced upper feed mechanism that works in sync with the lower feed to smoothly guide fabric from both the top and bottom. Ideal for quilting, matching plaids and stripes, and precision sewing, it's also great for handling difficult-to-sew fabrics.

### Convertible Free Arm

The Janome free arm is designed to provide easy access to small, hard-to-reach areas like sleeves, cuffs, and other tubular items. By reducing the sewing surface, it enhances precision and control, making it ideal for garment construction and alterations.
